EXPERIENCE

Softalya – Frontend Developer Intern

2021 June - August

- Worked on company's project's web application on-site. Implemented given adobe xd designs and their functionalities using React Javascript, Redux, GraphQL, CSS.
- Learned about backend using Python FastAPI and SQLAlchemy.

EDUCATION

Bilkent University

2019 - 2023

Bachelor's Degree in Computer Science

- Honour Student with CGPA 3.14
- Took courses: Algorithms and Programming I&II, Fundamental Structures of Computer Science I&II, Digital Design, Computer Architecture, Object Oriented Software Engineering, Programming Languages, Computer Networks, Introduction to Machine Learning.

Planning to take: Basics of Signals and Systems, Operating Systems, Database Systems.

Özel Antalya Fen Lisesi

2015 - 2019

Science Highschool

- Ranked **1056th** in TYT (<0.05%) and **1869th** in AYT out of **2,390,491** participants in 2019 YKS (the annually held university entrance exam of Turkey).

PROJECTS

Releases, demonstrations and source codes of all projects, including the ones listed below are in the portfolio page: yektaseckinsatir.com/projects .

Portfolio Page: Current personal webpage. Maintainable and scalable code. **Used:** ReactJS, vanilla CSS.

SatVI: Craigslist-like app with separately implemented and deployed Backend and Frontend. **Used:** CSS, ReactJS, Redux, GraphQL, Python fastAPI, SQLAlchemy.

WCDTTBot: A social experiment subreddit bot with an internet friend. Invites random users to a private subreddit, kicks inactive users, ranks them with flairs. Currently moderating ~50 active users. **Used:** Python PRAW.

Relativity-Simulator: A desktop game to simulate special relativity by decreasing light speed to 100px per second. Followed Java and OOP conventions. **Used:** Vanilla Java.

MonitoRing: Freshman project with 5 friends. An android app to track Bilkent's bus system (Rings) with google maps API. **Used:** Android Studio, Firebase, Java.

SKILLS

Skills are better listed **with code examples** in the portfolio page: yektaseckinsatir.com/skills

Languages: Javascript, C++, Python, Java, CSS, HTML, MIPS ASM, Systemverilog, UML.

Technologies: React, Redux, GraphQL, fastAPI, SQLAlchemy, Firebase, Git.

Other: Neat and Efficient Coding, Object Oriented Software, Databases, Frontend State Management, Testing, Requirement Analysis, Software Design.

Soft Skills: Self-learning, learning from and teaching to peers, time management, positive attitude.

Spoken Languages: Turkish (native), English (full professional proficiency), German (intermediate learner), Spanish (beginner).
